

WILLIAM JOMEB VILLANTAY

Walnut, CA 91789 | (909) 272-1868 | williamvillantay@gmail.com

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Java, C++, R, HTML/CSS

Frameworks & Libraries: React, Node.js, Express, Pandas, NumPy

Data & Tools: MongoDB, PostgreSQL, MySQL, Docker, Git/GitHub, Postman, Jupyter, RStudio

SELECTED PROJECTS & VENTURES

Omen - AI Desktop Command Dashboard

2026 - Present

Electron, JavaScript, Node.js, Anthropic SDK, Picovoice

- Developing an Electron desktop AI assistant that integrates Anthropic's Claude API with voice-triggered controls and project tools.
- Implemented approval-gated actions, multi-agent review coordination, persistent execution records, and automated tests across desktop workflows.

PackBattles - Founder & Full-Stack Developer

2023 - Present

React, Node.js, Express, MongoDB

- Founded and built a full-stack TCG platform with authentication, inventory, pack openings, battles, upgrades, trading, and administrative workflows.
- Connected responsive React interfaces to Node/Express services and MongoDB; added activity logging and automated email notifications.

Parking Availability Prototype - Team Captain (2nd Place)

2021

Irvine 36-Hour Hackathon | C++, Computer Vision

- Led a 4-person team during a 36-hour hackathon, coordinating task ownership, development, integration, and presentation.
- Built a C++ camera-based prototype that identified license plates and updated an app with occupied and available parking spaces.

Robotic Rover Arm - Subteam Captain

2021

Irvine Valley College | Python, Applied Kinematics

- Led a 4-6 person robotic-arm/kinematics subteam within an overall rover project of approximately 32 members.
- Implemented Python forward and inverse kinematics to calculate a gripper's 3D position and convert target coordinates into joint angles using trigonometry and physics-based equations.

TECHNICAL EXPERIENCE

IT Technician

Aug 2022 - Present

Cal American Dental | Pomona, CA

- Install and configure dental imaging equipment and software for X-ray systems and newly constructed treatment rooms, providing ongoing hardware and network support.
- Maintain office server operations and verify patient files are reliably stored and retrievable by authorized staff.
- Troubleshoot practice-management and payment-processing workflows, including insurance-related transactions.

Cybersecurity Specialist

Feb 2023 - Jun 2023

ForAllSecure | Marina, CA

- Generated more than 100,000 test strings for fuzzing software to expand security-testing input coverage.
- Collaborated with engineers to investigate software defects and security issues, research emerging threats, track work in GitHub, and document resolutions.

Volunteer Technology Instructor & Python Developer

Jan 2023 - May 2023

North County Recreation & Park District | Marina, CA

- Built two branded Python applications - a Lotería game and a Garapon random-number generator - for community programs.
- Led weekly Tuesday 3-7 PM technology sessions for approximately 32 participants, from teens through older adults, teaching them to run the tools in VS Code.
- Packaged the applications as Windows executables for one-click use after the volunteer engagement ended.

EDUCATION

M.S. in Information Technology, Data Science Concentration

Expected May 2027

California State University, Fullerton

Bachelor of Science in Computer Science

May 2023

California State University, Monterey Bay

Associate of Science in Computer Science

Aug 2021

Irvine Valley College
